☐ I have read the packing instructions provided by Hanna Instruments and hereby accept that processing costs will be charged to us in the event of incorrect packaging.

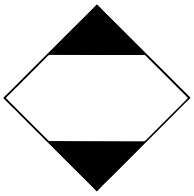

☐ This concerns a return shipment for which no costs are charged (maximum 1 time per year).

Signature: .....

Return date: .....

PACKING INSTRUCTIONS

The processed vials must be properly closed and packed in the original packaging and the box in which they were delivered by Hanna Instruments. These must then be packed in a box filled with packing chips to prevent breakage during transport. This box must be closed with adhesive tape and provided with an LQ label.

PROCESSING

Hanna Instruments handles the return and processing of the used vials. If you wish to return vials, this is only possible if registered via this document. Once you have registered the shipment with us, Hanna Instruments will ensure that everything is handled. We will instruct the carrier to collect the shipment. You are requested to carefully check the details regarding the collection address and contact person. Please also take into account any deviating collection times.

COSTS

This service is performed free of charge once a year, provided all instructions have been followed. Additional shipments will be charged at 235 euros per shipment to cover transport and processing costs. If a shipment is not packed according to the instructions, the processing costs will be passed on to the client.

INFORMATION

For questions regarding this service, please contact our sales department.
